

Technical Analyst Program

Your field of responsibilities

The program offers you comprehensive technical training and a variety of career development paths. You'll have hands-on experience and the possibility to work on impactful and innovative projects within areas of:

- Data Science and Analytics
- Cyber Security
- Machine Learning
- Artificial Intelligence and Robotics
- Innovation and Automation
- Cloud and FinTech.

Your program's highlights

You will start on a 3-month internship (30-40 hours per week, start date: March 2022) and by the end of the internship, you'll have gained insight into the bank and its culture, as well as will start to build your professional network.

We'll provide you with the resources and opportunity to get acquainted with Credit Suisse, your team and the functioning of various systems and applications.

Upon successful completion of your internship, you'll move on to your next career step with our full time 24-month Technical Analyst Program. This program allows you to work in an environment where creativity, problem-solving and drive are strongly encouraged. After your 1st Year you get to change projects and/or functional areas giving you a wider scope of learning.

As a member of the Technical Analyst Program, you'll have a chance to participate in internal and external events that will help increase your visibility within IT and across the bank, as well as a dedicated set of training courses to help build your knowledge and experience.

Your future colleagues

We are a group of highly skilled IT professionals, who are passionate about what we deliver and the benefit it brings, we come from all backgrounds, and are a diverse and fun group of individuals. We work in a flexible, agile, and globally distributed environment. During the program you'll get an opportunity to meet us, and we will help you grow, not just within Poland, you'll join in with other colleagues from India, UK, Switzerland, and the United States.

We invite you to become a part of our community.

Your skills and experience

Candidates should have an outstanding attention to detail, comfortable balancing multiple assignments at once, and a sense of accountability. You should also possess highly developed analytical, interpersonal and communication skills to enable them to build links with key internal clients and complete tasks in an accurate and timely manner under pressure.

Each of the following qualifications/skills and experience are preferred, but not required:

- Evidence of strong technical academic background in an IT related field (Computer Science, Physics, Engineering or Mathematics), Economics, Management or Finance
- A proven ability to work in a sophisticated and fast-paced environment
- Experience in developing code (applications, components, interfaces, etc.)
- Experience in the development of models (data, function, objects, etc.)
- Client-focused and ability to develop creative solutions
- Critical thinker and excellent analytical skills
- Able to work as a part of the team, and on your own.

Your new employer

Your growth is our priority. Credit Suisse offers you the ideal environment to start a successful career, attractive benefits, excellent training and managers to support your development.
