

**Dear Sirs,**

We would like to invite you for the next edition of our webinar, in which we will present you how in practice one could utilize the plausibilities given to us by the customs law to increase the efficiency of the supply chain and gain the advantage in form of lowering or eliminating customs duties by the importers, as well as increase competitiveness by the entities exporting their goods outside the EU.

In this edition we will also include the newest developments, which could present a possibility to increase the savings. We will also answer your questions and doubts that most frequently were asked during and after previous webinars.

In this webinar we will answer the following questions:

- ◆ When do we pay customs duties and what can we do about it?
- ◆ Items of charge - what take into account?
- ◆ Special procedures - how to effectively utilize them in your business?
- ◆ Tariff suspension - a real chance for real multimillion savings in customs duties.
- ◆ Customs data analysis - what can be read from your data and how to use it?
- ◆ Exporters perspective - how to utilize the current customs law in order to gain competitive advantage?

This webinar will take place on **4h of October:**

🚩 **11:10 - 12:10 English version: ***Register!*****

The meeting will also be held in Polish. [More details on the website](#)
